DWA_08 Discussion Questions

In this module you will continue with your "Book Connect" codebase, and further iterate on your abstractions. You will be required to create an encapsulated abstraction of the book preview by means of a single factory function. If you are up for it you can also encapsulate other aspects of the app into their own abstractions.

To prepare for your session with your coach, please answer the following questions. Then download this document as a PDF and include it in the repository with your code.

_____

1. What parts of encapsulating your logic were easy?
   - Creating and appending the image element.
   - Creating and appending the book title element.
   - Creating and appending the author element.

_____

2. What parts of encapsulating your logic were hard?
   -
   - Debugging, it can be challenging to identify errors or debug issues within the template string.

_____

3. Is abstracting the book preview a good or bad idea? Why?
   - Personally i think it is a good idea because the code improved in terms of readability and the complexity was managed well

_____
